(54) Title: **GASTRORESISTANT TABLETS FOR ALIMENTARY, DIETETIC AND THERAPEUTIC USE**

(57) Abstract: A novel formulation for oral use is described, said formulation containing at least one active principle with a pharmaceutical, dietary or alimentary action, in combination with at least one fat and/or phospholipid in an amount of between 5 and 30 %, relative to the weight of the formulation: this formulation allows the slow release, over time, of the active principle under physiological conditions which simulate the digestive processes which normally take place in the stomach.
